Enhance Customer Service

King County Library System continually strives to enhance service to our customers. The e•vents program easily and quickly allows customers to search for events across all 43 KCLS libraries. e•vents offered a solution to keep up demand, given our limited staff resources. Providing our customers the ability to view and search System-wide events as well as the direct email notification, will greatly increase communication with our customers and provide promotion of our events. The team at e•vanced was very quick to respond to pre-sale questions, and are giving us the same prompt, knowledgeable response with all post-sale correspondence, including tech support.

Lisa Hill, Web Services Librarian
King County Library System, WA
